Location: Canberra

Reference: 63/2023- 1

Employment type: Permanent

Contact: contracts_tss@omniexe.com

This role is accountable under routine direction to undertake moderately complex administration of Windows Server virtual machines hosting MicroFocus Content Manager and Elastic Search, and these applications.

The team uses Azure Devops and PowerShell continuous delivery workflows, and conducts security, backup and performance tuning. Role scope may include assisting the team with system administration of other commercial-off-the-shelf (COTS) enterprise information and IT-enabling applications. MSSQL support is provided by technical colleagues within the team.

Windows System Administrator SFIA 3

Close date: 16 Mar 2023

Location: Canberra

Reference: 63/2023- 2

Employment type: Permanent

Contact: contracts_tss@omniexe.com

This role is accountable under routine direction to undertake moderately complex application and system administration including managing incidents, changes, problem outages, upgrades and patches.

The technical environment includes management of Windows Server virtual machines for application hosting, various commercial-off-the-shelf (COTS) enterprise information and IT-enabling applications, sensitive customer data management, PowerShell continuous delivery workflows, and security, backup and performance tuning for applications and supporting services.

MSSQL Database Administrator SFIA 4

Close date: 16 Mar 2023

Location: Canberra

Reference: 63/2023- 3

Employment type: Permanent

Contact: contracts_tss@omniexe.com

This role is accountable under general direction to undertake complex MSSQL database administration and virtual server fleet sustainment.

The team uses Azure Devops Server and PowerShell continuous delivery workflows, and conducts security, backup and performance tuning. Tasks may include including service sustainment, incidents, changes, problem outages, upgrades, patches, scripted transformations of data sets and implementation, maintenance and improvement of automated system management scripts.

Lead MSSQL Database Administrator SFIA 5

Close date: 16 Mar 2023

Location: Canberra

Reference: 63/2023- 4

Employment type: Permanent

Contact: contracts_tss@omniexe.com

This role is accountable under broad direction to lead and implement an extensive range and variety of complex MSSQL database administration duties and virtual server fleet management.

The team uses Azure Devops Server and PowerShell continuous delivery workflows, and conducts security, backup and performance tuning. The role has discretion and authority to use initiative and experience in rebuilding, upgrading and configuring existing database services, scripted transformations of data sets and implementation, maintenance and improvement of automated system management scripts.

Data Architect SFIA 6

Close date: 16 Mar 2023

Location: Canberra

Reference: 63/2023- 5

Employment type: Permanent

Contact: contracts_tss@omniexe.com

This role has authority and accountability for technical decisions and planning, managing and assisting with the implementation for the architecture of ASD Corporate MS SQL service and supporting virtual server fleet, covering data integrity, efficiency, availability, reliability and security.

The Data Architect provides guidance to Digital Workplace Services staff and management on business benefits and risks, particularly in relation to data security, and leads and coordinates sustainment, problem solving and future-proofing tasks. The role works with key customers to understand their data storage needs and with other ICT service technical leads to ensure the SQL service handles projected growth and continually improves in quality of service and how the section delivers and sustains the service.

Service Architect SFIA 6

Close date: 10 Mar 2023

Location: Canberra

Reference: 65/2023- 1

Employment type: Permanent

Contact: contracts_tss@omniexe.com

The Service Architect for Cloud Solutions is responsible for the design, development and implementation of the technology solutions and mapping of cloud business requirements to systems/technical requirements to ensure they are in line with the enterprise architecture plan.

The Service Architect for Cloud Solutions educates management and customers on the implication of new cloud technologies and clearly articulates the benefits to the business by providing guidance and strategy documentation.
