

Omni is an Australian-owned business focused on delivering innovative defence, national security, intelligence and critical infrastructure solutions to further our national interest.

Our locally based, expert teams deliver cutting-edge technology and pioneering solutions in support of Australia's sovereign capability.

In an increasingly complex global environment, individuals, businesses and governments face an ever-growing list of threats that generate traditional and nontraditional risks to people, assets, infrastructure, systems, and interests. Omni's breadth of capability, proven experience and trusted approach helps to protect individuals, corporates, and governments from those threats.
